Work Experience

Front End Developer, Lampros Labs – Remote, USA | Restructure & Budget Constraints Feb 2024 – Aug 2024

- **Validation Systems:** Overhauled Ocusell.AI's listing creation tool, reducing submission errors by 45% through a dynamic error resolution system validating inputs against multiple MLS rulesets.
- **Cross-Platform Development:** Transformed the desktop version of Color ConneXion® 2.0 into a cross-platform application using Flutter and Dart, ensuring seamless functionality on smaller devices for enhanced accessibility.
- **Product Strategy:** Designed Figma-based UI/UX workflows for RESO Unique License Identifier, adopted by enterprise real estate systems to standardize licensee data management.
- **Scalable Architecture:** Developed a dynamic company website using a headless WordPress setup, incorporating advanced ACF fields, reusable components, and implemented unit tests using Vitest.
- **Client Collaboration:** Led end-to-end development of a WordPress site for a world famous beverage expert, communicating directly with clients, delivering a 100% client-approved solution within deadlines.

Lead Front End Engineer, GameStar Exchange – Remote, USA | Project-Based Contract Jul 2022 – May 2023

- **End-to-End Ownership:** Architected and launched desktop version of crypto trading app (React/Next.js), boosting PC user engagement post-launch.
- **Strategic Technical Research:** Led technical discovery initiatives, presenting data-driven solutions directly to CEO.
- **Mentorship:** Collaborated with designers and PMs to establish realistic component library standards, reducing UI inconsistency by 60%.
- **User Experience:** Revamped trade creation flow w/ step-by-step guidance, cutting user drop-off by 25%.

Front End Web Developer, Sangcate Trading – Remote, USA | Project-Based Contract Mar 2022 – May 2022

- **Web3 Platform Development:** Developed 3 different versions of a NFT minting website by transforming the website based on the phase of the minting process, ending with a successful and profitable mint and release.

Front End Web Developer, Shane Company – Remote, USA Aug 2018 – Aug 2020

- **Revenue Growth:** Conceptualized 3 re-usable interactive product recommendation quizzes for a 200 million dollar company by programming an easily editable quiz component, producing increased sales from product suggestions.
- **Reusable Systems:** Created component library for 720k+ monthly users, still utilized in 80% of ShaneCo.com pages.

Projects

[Ocusell.AI](#)

[Michaelsparkin.com/lampros/](https://michaelsparkin.com/lampros/)
